

Portable Autonomous Vacuum Insulated Cryosurgical Device on Liquid Nitrogen

-170°C

Advantages of Cryosurgery

- * Cosmetic effect
- * Analgesic effect
- * Regenerative effect
- * Antiseptic effect
- * Hemostatic effect
- * Immune stimulation

Fields of Application

- * Gynecology (CI-401)
- * Dermatology (CI-402)
- * General surgery (CI-402)
- * ENT (CI-403)
- * Arthroscopy (CI-404)

Criolnej® is user-friendly, simple and safe in operation. Can be used both in hospitals and ambulance clinics.

Standard Equipment

- Cryoreservoir for LN₂
- Cryoprobe
- Kit of cryoapplicators
- Passport and User's Manual
- Dewar vessel (option)
- Fluid transfer device (option)

Technical Specification

- Coolant liquid nitrogen
- Temp. of cyoapplicator, min. -170°C
- Capacity of cryoreservoir 450 ml
- Overall height. 295 mm
- Length of cryoprobe CI-401 280 mm
- Length of cryoprobe CI-402 165 mm
- Weight of CI-401. 950 g
- Weight of CI-402 850 g
- Power supply. not needed

Cryoapplicators for gynecology

Cryoapplicators for dermatology
